* Uses Metal & Vulkan API

Title: Sweven
Genre: Adventure, Indie
Developer:
CG-Interactive
Publisher:
CG-Interactive
Release Date: 22 Apr, 2017

a09c17d780

Minimum:

OS: Windows XP SP2

Processor: SSE2 instruction set support

Memory: 4 GB RAM

Graphics: Any card with DX9 (shader model 3.0)

DirectX: Version 9.0

Storage: 4 GB available space

Sound Card: Any sound card capable of 2.0 Stereo sound

English

\u2b50\u2b50\u2b50\u2b50. The poor man's Limbo: I purchased this game as it reminded me of the aforementioned game. Limbo was a great and rather interesting platformer and Sweven looked like a game trying to imitate this experience. Instead, we get a really short game (completing all stages should take no longer than 30 minutes) and that's it. The rest of the playtime is only for idling in order to get all the trading cards it has to offer.

While the game's black and white themed design is similar to that of Limbo it does not have the same atmosphere. This is not necessarily a problem as Limbo was quite sad and depressing; in Sweven our rabbit protagonist manages to get back to its family safe and sound. There isn't much information telling us why we go from the surface to the caves and what we're doing in the world of men (with all the shields and spears the time period is definitely not modern).

In any case, this is a short and interesting platformer but I think you are better off with Limbo. Also, the game puts a lot of emphasis on its music which - it says - should be listened to by wearing a headset. This, similarly to the rest of the game, I found mediocre.. Sweven is what happens is when your animations are poor, your assets are buggy, and you don't even have enough budget to add colour to your game.
Between a sheer lack of content, inconsistent controls and the occasional lack of proofreading, the only memorable aspect of Sweven is how all its jolly bugs manage to occupy a whole 3.7 GB of hard disk space.. I bought that game as soon as I saw it on the new release, because it kinda reminded me on Limbo.
I instantly installed it and finished it already in about 30min.
So it is a pretty short game, it had only a few level (seven if I recall correctly) and most of them are pretty straight forward rushing through them. There was only one level that took me a bit longer than just running through it.
Also the level doesn't seem to have a real connection between them.
The story ... well it wasn't really there; you start in a cage and end up back at your parents at the end of the game, but besides a few sentences here and there the game has no real story, besides getting back to your parents.
Addionally the ambience wasn't that great, because you have a few sound effects here and there, but that's all as far as I remember, I don't even remember the game having any music. (maybe it had, but it didn't really take notice of it)
So it was nowhere close to being something like Limbo.
That takes me to the point that I can't recommend the game at all, it would have been better as a free game or a demo to a bigger game, but for the 1.99\u20ac, where I live, it is way too much to ask for such a short pretty boring game.. Really loved this small, short adventure.
Minimalistic, but with awesome black and white graphics and a dreamy tale.
And completely playable with a normal controller :)
Really recommended!
